

RAPHAEL RODRIGUES FRANCO

Data & Analytics Specialist • Microsoft Data Analyst

raphael.rfranco@gmail.com

(16) 9 9191-3546

About Me

I have a very solid experience working with Business Intelligence and Data Engineering on Microsoft platform. I also have a Postgraduate degree in Information Management (Business Intelligence) and a collection of well-recognized data related certifications.

I have years of experience working with technology projects focused on numerous databases operations like, data loading, extraction, and developing easy to understand and reliable reports and dashboards.

I can help your team to solve numerous problems, deliver great results and even train junior peers.

Experiences

CI&T, Data & Analytics Specialist

2022

- As a data specialist, I worked with the company's internal BI team
- I worked on requirements gathering for a new data architecture of BI systems for the Azure platform.
- I also worked on the creation of ETL packages, creation and databases for Data Scientist teams
- I collaborated on projects in the accounting and financial areas, feeding the data cubes with information from ERP systems
- Working with the BI support team in answering calls and demands from internal customers for information and reports.

SicoobCredicitrus, Data Engineer

2017-2022

- I started my activities within SicoobCredicitrus as a SQL Server DBA Analyst, helping the software development team. I worked on creating T-SQL queries, Procedures, Views and Functions for the development team.
- In a critical environment, I managed and restored databases, also developed ETL activities, creating data packages in Microsoft Integration Services from IBM DB2 databases.
- I also facilitated the implementation of Microsoft Analysis Services, creating the entire semantic layer for the Cooperative's BI, developing metrics and KPIs for teams from the Commercial and Accounting departments.
- Our team was a pioneer, where we implemented and disseminated the Data Driven culture in the cooperative with Power BI, creating dashboards and reports throughout the company.

Artivinco, Systems Analyst

2014-2017

- At Artivinco I performed activities and projects for the development of backoffice systems and for the manufacturing industry.
- **Managing databases in a high performance 24x7 environment.**
- Also developing loads of data and reports for the Human Resources area
- I worked on a wide range of projects to implement the ERP system HR module at TOTVS, configuring and restoring databases, data modeling, reports and payroll.
